Sir:

The captioned application has been accorded an Allowance Date and is being prepared for issuance. However, on July 18, 2007 a Notice to File Corrected Application Papers was issued for the captioned application. More particularly, the Notice indicated that the application contained drawing deficiencies with regards to Figs. 3 and 4.

Upon review of Figs. 3 and 4 applicants could detect no error in the figures.

Accordingly, on August 13, 2007, applicants had a teleconference with Nadine Clark at the

US App. No. 09/631,339  
Response to 7/18/07 Notice

Office of Patent Publication of the US Patent and Trademark Office to request a clarification of the objection to Figs. 3 and 4. During that conversation Ms. Clark indicated that Figs. 3 and 4 appeared to have lead lines that were not labeled with a reference line. The undersigned attorney noted that element 35 (a thermal coupler sensor) and element 31 (a heating coil) were drawn with electrical wire(s) extending away from the respective elements. Ms. Clark confirmed that the indicated wire(s) leading away from elements 31 and 35 are what she believed represented unlabeled lead lines. Accordingly, applicants respectfully submit that Figs. 3 and 4 currently of record do not contain unlabeled lead lines, and thus the drawings currently on file are free of any defects.

Applicants respectfully request acceptance of the current set of drawings and passage of the application to issuance.

Respectfully submitted,

John P. Breen
